ABOUT ME -----

I have professional experience with both small start ups and some world renowned brands. I'm a dynamic designer with a passion for creating captivating visual experiences. In graphic design, I've mastered Marketing and Brand Design by simultaneously honing my skills in Adobe Creative Suite, typography, brand book design, layout, print and digital design, UI/UX, web design, logo design, illustration, visual communication, and color theory.

In Industrial Design, I excel in Computer Aided Design software, product design, prototyping, 3D modeling, sketching, ergonomics, materials, concept development, design thinking, and human-centered design. I'm adept at managing product life cycles, incorporating sustainability, user research, DFM, rapid prototyping, and detailed documentation. I've also delved into packaging, consumer electronics, and automotive design.

My track record includes winning awards like the IF Design Award and owning a patent. I am looking for my next role that helps me utilize my varied experience and push myself even more. I want to be the design expertise in the team that brings a new set of viewpoints. I aspire to build inspiring designs, and I crave to be bold.
